Seeding Rate: 75-150 lb per acre, or 3-5 lb per 1,000 sq ft

Grasses & Grass-like Species, Lawn & Turfgrass Sites, Mixes

Durable and drought resistant, the ryegrass will stay greener in hot weather. The red fescue will work well in dry to wet shaded areas and a variety of soil conditions. An ideal, inexpensive lawn mix for high-traffic areas. Mix formulations are subject to change without notice depending on the availability of existing and new products. While the formula may change, the guiding philosophy and function of the mix will not.
