Grasses & Grass-like Species, Herbaceous Flowering Species, Mixes, Wet Meadows & Wetlands, Wildlife Habitat & Food Plots

This combination of annual and perennial grasses, forbs and grass-like plants provide food and cover in wet or flooded riparian areas, as well as in draw-down areas in retention basins or wetlands. Seed from October-May. Mix formulations are subject to change without notice depending on the availability of existing and new products. While the formula may change, the guiding philosophy and function of the mix will not.
