Grasses & Grass-like Species - Herbaceous Perennial; Wet Meadows & Wetlands

This wetland restoration and mitigation mix contains some of our most popular native species to create a permanent grass and forb cover. Seed from October-May in full sun or partially shaded areas in rich, wet, saturated soils; tolerates standing water during the dormant season and part of the growing season. Mix formulations are subject to change without notice depending on the availability of existing and new products. While the formula may change, the guiding philosophy and function of the mix will not.
