Mixes, Uplands & Meadows, Wildlife Habitat & Food Plots, Wildlife Habitat & Food Plots

This perennial grass mix with re-seeding annual forbs creates attractive first-year color and perennial cover when planted in full sun or partially shaded areas. Seed from October-May in rich well-drained soils. Mix formulations are subject to change without notice depending on the availability of existing and new products. While the formula may change, the guiding philosophy and function of the mix will not.
